

Medication Synchronization

At Univera Healthcare, we are collaborating with many pharmacies to provide an easy and convenient option to manage your prescriptions and stay on track with your medications.

Research shows that people who do not refill their prescriptions when needed are more likely to miss a dose which can lead to serious health conditions. If you are juggling multiple prescription medications for yourself or someone you care for, it can be challenging to keep track of the refill dates for each prescription. As a Univera Healthcare member, you have the option to synchronize your prescription refill schedule and pick up all your eligible prescriptions on a single, convenient day each month (or every three months if you have 90-day prescriptions).

Medication Synchronization works best for most maintenance medications. The requirements vary for controlled substances, "as needed" medications and one-time medications, such as antibiotics and would not be appropriate for medication synchronization.

Making Life a Little Easier

Medication Synchronization is provided at no cost for Medicare members who have a Part D plan with Univera Healthcare. This program offers the following benefits:

- Confidence knowing that you will have every medication you need, when you need them
- Improves your ability to take medications as prescribed
- Combines multiple calls and trips to the pharmacy into one easy trip
- Provides an opportunity to meet with your pharmacist routinely and discuss your medications, side effects, dosages or any other questions you may have.

Next Steps

If you would like to sync the timing of your medication refills, contact your pharmacy. Your pharmacist will advise you if they offer this service. Pending participation, the pharmacist will sync your medication refills, set up a reoccurring pickup date and get you on track to better health!

More information about Medication Synchronization can be found here:
